Signature

Harsh Mishra (1BM17CS028)  
Prakhar Srivastava (1BM17CS063)  
Kartik Kumar Sethi (1BM17CS040)

## **INTRODUCTION**

Trade Mate provides an easy way to buy products through an app. We have created an e-commerce app through which users can buy different items. Items are segregated based on category. The app contains a dynamic search feature through which the user can easily search for items.

We used android studio as our framework and google firebase as our database. All the items information and images were stored and retrieved from firebase. The user first has to create an account in order to use the app.

This application has been created in order to provide a uniform platform to order the desired items for the customers.

## **CONCLUSION**

We have presently created an online Trade mate app. This app will be improved and new modifications will be provided with the need of the hour. This is just a basic version with a simple and a user-friendly interface and we will be working on it to improve it and releasing newer versions.
